

Our mission is to improve the quality of life and outlook for children with profound special needs and their families which care for them. Focusing on children suffering from debilitating neuromuscular diseases such as muscular dystrophy and cerebral palsy as well other rare genetic disorders, we aim to provide life-changing home modifications, medical equipment and support services for families in desperate need of help. We understand the enormous stress and life-long challenges of caring for these children and seek to provide relief and make a real difference in the lives of local Berks County families in need.
